

## Brand New Beta/Gamma "L" Shield

Manufactured by Capintec for facilities that use both Beta emitting and Gamma emitting nuclides.

### FEATURES

- Utilizes all the specifications and features of the Standard "L" block, with a 1/4" acrylic plastic interior "L" Shield.
- Two shields in one (Beta/Gamma).
- Avoid the hassle of switching out "L" blocks.
- Weight: 100 lbs

## Acrylic "L" BETA Shield

This crystal-clear acrylic portable "L" shield is designed to provide a safe working area for handling beta emitting nuclides. With dimensions of 12.125" high by 11.75" wide on a stable base, the BETA Shield offers an excellent viewing area. The shield is a full inch-thick stopping beta radiation from nuclides producing up to 5 MeV energies. With all these features, the Capintec BETA "L" Shield is an excellent companion to the BETA Dose Calibrator.

ITEM #	DESCRIPTION
5130-2090	Standard "L" Shield
5130-2161	Gamma Shield Insert
5130-2083	Acrylic "L" beta Shield
