

Decontamination Kit

This kit contains all protective clothing, decontaminants and accessories for handling radioactive spills or other routine contamination problems in the lab. Each kit comes in a 13 gallon metal drum with a radioactive label and can be used for storing radioactive waste.

Kit Components: Metal drum (13 gal.), Latex gloves (2 pr), Coveralls (2 Lg.), Hoods and shoe covers (2 ea.), Respirators (2), Radiclean (1 liter), Rad-Con hand and surface cleaner, Poly bag (10), Niptongs (12"), Sponge mop, scrub brush, plastic pail and assorted warning signs, placards and rope.

Minor Spill Emergency Kit

Capintec's Minor Spill Emergency Kit is based on the suggested contents described in NRC Reg Guide 10.8, revision 2: "Medical Use Programs", Appendix J "Medical Spill Procedures". On page 81 we show a "Decontamination Kit" for major spills. The Minor Spill Kit is better suited for use in the Nuclear Medicine area.

All kit contents are packaged in translucent yellow tint, 4 mil plastic liner to be stored for quick retrieval in the event of a contamination incident. The kit includes Emergency Procedures and forms to document a spill and decontamination efforts.

Spill Kit Includes:

- 6 prs. of disposable gloves
- 1 pr. housekeeping gloves
- 2 ea. disposable lab coats
- 2 ea. paper hats
- 2 prs. disposable shoe covers
- 1 roll absorbent paper w/ plastic backing
- 6 yellow plastic bag liners with twist ties
- 1 roll tape "Caution Radioactive"
- 1 pencil
- 1 black pen
- 3 pre-strung tags "Caution Radioactive Material"
- 10 supplies for contamination smears samples
- 1 clear clip board
- Instructions for "Emergency Procedures"
