

## Warning Labels & Tape

State and Federal regulations require that all radiation areas and radioactive materials be identified conspicuously and properly to provide adequate warning to anyone in the area.

## Roll Paper Tapes

These tapes are easily marked with a pencil or pen and are pressure sensitive for easy application. Each label is perforated and may be used with or without a tape dispenser. The official NRC radiation symbol and wording are printed in magenta on a yellow background.

## Roll Labels

These tapes are pressure sensitive and will stick to almost anything, resist moisture and can be removed if required. The official NRC radiation symbol and wording are printed in magenta on a yellow background. These tapes can be marked with a pen or permanent marker.

## Warning Tape

In areas where hazards may require a warning, these vinyl tapes offer the greatest strength and versatility. This pressure-sensitive durable tape is able to stand long-lived usefulness in many applications. The official NRC radiation symbol and wording are printed in magenta on a yellow background.

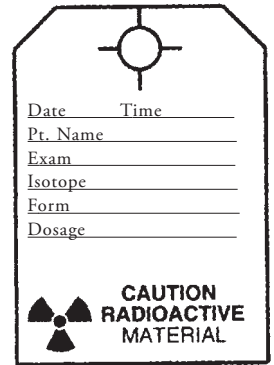

ITEM #	DESCRIPTION
0685-T001	1" x 1½" x 180' Roll CAUTION RADIOACTIVE MATERIAL
0685-T002	3" x ¾" x 42' Roll CAUTION RADIOACTIVE MATERIAL Isotope, Amount, & Date
0685-T013	3" x 1" x 180' Roll RADIOACTIVE MATERIAL
0685-M001	5/8" x 1" (500 per roll) CAUTION RADIOACTIVE MATERIAL
0685-M003	2" X 1" (500 per roll) CAUTION RADIOACTIVE MATERIAL Isotope, Amount & Date
0685-T104	7" x 1" (100/pack) RADIOACTIVE MATERIAL SECURITY SEAL
0685-M005	1 ¼" dia. (100 per roll) Radiation Symbol
0685-101V	1" x 180' Roll Magenta and Yellow stripe with symbol
0685-200V	2" x 108" Roll Magenta and Yellow stripe no symbol
0685-W001	2" x 90' Roll Tyvek Magenta and Yellow stripe with symbol
0645-0023	Heavy duty tape/label dispenser

# Warning Signs & Labels

State and Federal regulations require that all radiation areas and radioactive materials be identified conspicuously and properly to provide adequate warning to anyone in the area.

## Syringe I.D. Tag

There are numerous ways of labeling a syringe. Capintec offers labels and tags to meet virtually all requirements. The small syringe I.D. tag shown on the right is easily placed over the plunger of a syringe for identification during transport, or as a removable tag when making up several pre-loaded syringes, thus reducing the chance for error.

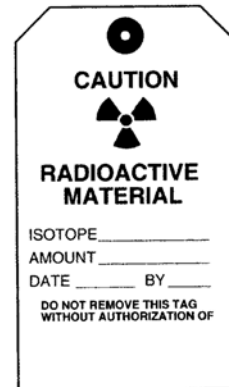

0685-M103

## Tags

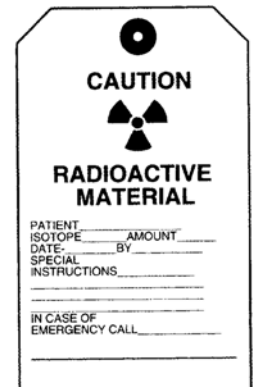

The use of tags can be very helpful in many situations. The tags shown on the right have magenta lettering on yellow cardstock. If the tag you need is not shown, please give us a call with your requirements.

## Labels and Signs

Easy peel-off backing and pressure sensitive label adheres to almost any surface. High durability adhesive insures that the labels will stay in place after applying. These labels and signs are available in several different materials.
