

Shielded Containers

Square Lead Container

This is an ideal storage container for the small hot lab where space is at a premium. The 1/2" walls offer adequate protection from exposure to radiation from most nuclides used in the Nuclear Medicine Department. The shield has a removable tray that provides a second level for maximum use of the storage area. Carrying handles are on the tray, cover and sides of container. The hasp on the lid allows locking of the shield to meet requirements

Lead-Lined Storage Cabinet

This is the perfect container cabinet for all nuclear medicine labs. The cabinet is lead lined and has lead glass doors that allow full visibility of the contents without removing the product from its protected position. This cabinet can provide an extra margin of shielding for nuclides stored in lead pig containers.

This cabinet has 1/16" lead lining the enclosure and 1/4" lead glass sliding doors plus adjustable shelves. Dimensions are 15 1/4" wide x 10" high x 7 1/4" deep and weighs 15 lb.

Stainless Steel Waste Can

All Nuclear Medicine Departments need this rugged container to hold radioactive waste safely until disposal. It incorporates a lead-lined inner liner with a stainless steel outer skin for ease of cleaning. The unit is foot-activated with a step pedal to open. The inside is lined with 1/8" lead and has a removable lead lid and inner liner. The liner has a tuck-away handle to facilitate removal and emptying of contents. Polyethylene liners are available to facilitate waste removal and keep the inside clean and uncontaminated.

SPECIFICATIONS

- Shielding: 1/8" lead
- Capacity: 20 quarts
- Size: 12" x 9" x 19" high
- Weight: 40 lb.

Waste Storage

Apache Low Cost Waste Container

As an alternative to the stainless steel container, Capintec offers an economical foot-operated waste container in several sizes. The Apache Waste Container is epoxy painted for easy cleaning and is lined with 1/8" lead on sides, top and bottom. Additional thicknesses of lead may be requested.

Lead-Lined Decay Drum

These rugged containers will meet your needs for both short and long term storage of radiopharmaceuticals for decay. The lead-lined walls within the steel container drums significantly reduce the radiation hazard of waste generated in both the Nuclear Medicine Department and Nuclear Pharmacy. Our various sizes and lead wall thicknesses permit you to choose the Waste Container Drum that will best suit your needs.

FEATURES

- Made of 14 Ga-steel with regular barrel tops for sealing
- Waste drums come in 15 gal, 30 gal and 55 gal sizes
- Lined with 1/4" or 1/8" lead
- Dolly permits easy movement

ITEM #	DESCRIPTION
0660-0002	15 Gal Apache Style
0660-1518	15 Gal Waste Drum w/ 1/8" lead
0660-1514	15 Gal Waste Drum w/ 1/4" lead
0660-3018	30 Gal Waste Drum w/ 1/8" lead

ITEM #	DESCRIPTION
0660-3014	30 Gal Waste Drum w/ 1/4" lead
0660-5518	55 Gal Waste Drum w/ 1/8" lead
0660-5514	55 Gal Waste Drum w/ 1/4" lead
0645-0021	Dolly for 30 gallon container
0645-0030	Dolly for 55 gallon container
