

Counting Tubes

Popular size 12 x 75mm test tubes are available boxed and oriented in one direction for ease of use. The re-closable box minimizes scratches and damage during storage and protects the unused tubes. Box contains 250 tubes. Caps are leakproof, but can be easily removed. Caps may be ordered in white, red, yellow, blue, green or assorted colors.

Uniwire Test Tube Rack

Stackable with a single mold design that is coated with Nalgene® and easily cleaned, these racks are designed to hold the counting tubes above and hold up to 40 tubes.

Calibration Rod Sources

Capintec offers two rod sources for use with the CAPRAC and CAPRAC-R to perform the auto-calibration function. The Cs-137 source has a nominal activity of 0.5 μ Ci and the Ba-133 source is 0.1 μ Ci. If you do not have a rod source of Cs-137 or Ba-133 in your department, one of these sources should be ordered when purchasing your CAPRAC or CAPRAC-R.
